

# Your Teacher Toolkit

## Getting paid

This toolkit lets you build your own lesson. To help plan for calculations along the way, maths moments are shown with calculator.

### 1. Powerpoint

This is to aid delivery and should be used together with the lesson plan. Slides are broken down into chapters to match the sections on the lesson plan.

### 2. 2h:15 minute Lesson plan

The lesson plan can be delivered as:

- **One** 2hr, 15-minute session
- **Three** 45-minute chapters
- **A series** of 10-minute chapters for form time/assemblies

Discover timings and delivery tips to make the content accessible in these formats.

### 3. Videos

Videos are embedded in slides and on YouTube:

I'm starting a new job, what about my tax?

<https://youtu.be/P26wizs8I20>

How much do you really get paid?
